CINEMA OF PAIN
On Quebec's Nostalgic Screen

Edited by Liz Czach & André Loiselle
Jun 2020 240pp

9781771124331 Paperback £34.95 / €42.00

Whether it is in grandiloquent historical melodramas such as *Séraphin: un homme et son péché* (Binamé 2002), intimate realist dramas like *Tout ce que tu possèdes* (Émond 2012), charming art films like *C.R.A.Z.Y.* (Vallée 2005), or even gory horror movies like *Sur le seuil* (Tessier 2003), the contemporary Québécois screen projects an image of shared suffering that unites the nation through a melancholy search for home.

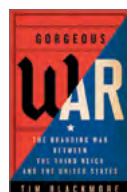

CUBISM AND FUTURISM
Spiritual Machines and the Cinematic Effect

"R. Bruce Elder's monumental new book...is a densely packed and vibrational collection of insights into the 'art of energy, light, and movement' of two central artistic movements of the early twentieth century." - Peter O'Brien, *Fortnightly Review*

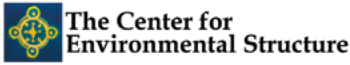

GORGEOUS WAR
The Branding War Between the Third Reich and the United States

By Tim Blackmore
Oct 2019 380pp

9781771124201 Hardback £26.50 / €32.00

"*Gorgeous War*, a highly readable book, shows that the US of Walt Disney and the Third Reich of Goebbels were two variants not just of modernity but of hypermodernity, no matter how glaringly different their surface 'styles' and their human consequences. It shows we cannot afford to demonize and 'other' Nazism too hastily because there is greater affinity between Nazi Germany and aspects of modern America than we might like to admit to ourselves." - Roger Griffin, Oxford Brookes University

The Center for Environmental Structure was founded by Christopher Alexander in 1967 to house his research, teaching and building projects. The Center continues his legacy by developing further the ideas presented in the four volumes of *The Nature of Order*, which create a sweeping new conception of the nature of things that is at once objective, structural, and personal.

In the four books in *The Nature of Order*, Alexander constructs an entirely new cosmology, grounded in the latest scientific knowledge, and integrating the perennial wisdom of the centrality of human experience and values. In this way, he reunifies for the field of architecture the 400-year old split of structure and feeling.

SECRETS AND SPIES**UK Intelligence Accountability after Iraq and Snowden***Jamie Gaskarth*

Jan 2020 320pp

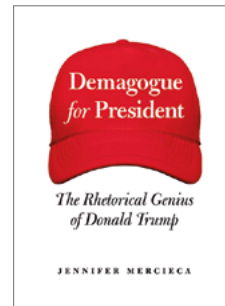

9780815737971 Paperback £29.95 / €39.00

The Chatham House Insights Series

How can democratic governments hold intelligence and security agencies accountable when what they do is largely secret? Using the UK as a case study, this book addresses this question by providing the first systematic exploration of how accountability is understood inside the secret world. It is based on new interviews with current and former UK intelligence practitioners, as well as extensive research into the performance and scrutiny of the UK intelligence machinery. The result is the first detailed analysis of how intelligence professionals view their role, what they feel keeps them honest, and how far external overseers impact on their work

Moving beyond the conventional focus on oversight, the book examines how accountability works in the day to day lives of these organizations, and considers the impact of technological and social changes, such as artificial intelligence and social media.

The issues explored in this book have important implications for researchers, intelligence professionals, overseers, and the public when it comes to understanding and scrutinizing intelligence practice.

DEMAGOGUE FOR PRESIDENT**The Rhetorical Genius of Donald Trump***Jennifer R. Mercieca*

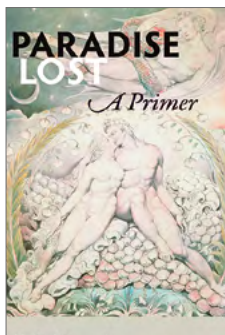

Jun 2020 320pp

9781623499068 Hardback £29.95 / €35.00

Historic levels of polarization, a disaffected and frustrated electorate, and widespread distrust of government, the news media, and traditional political leadership set the stage in 2016 for an unexpected, unlikely, and unprecedented presidential contest. Donald Trump's campaign speeches and other rhetoric seemed on the surface to be simplistic, repetitive, and disorganized to many. As *Demagogue for President* shows, Trump's campaign strategy was anything but simple.

Political communication expert Jennifer Mercieca shows how the Trump campaign expertly used the common rhetorical techniques of a demagogue, a word with two contradictory definitions - 'a leader who makes use of popular prejudices and false claims and promises in order to gain power' or 'a leader championing the cause of the common people in ancient times' (Merriam-Webster, 2019). These strategies, in conjunction with post-rhetorical public relations techniques, were meant to appeal to a segment of an already distrustful electorate. It was an effective tactic.

Mercieca analyzes Trump's rhetorical strategies to reveal a campaign that was morally repugnant to some but to others a brilliant appeal to American exceptionalism. By all accounts, it fundamentally changed the discourse of the American public sphere.

PARADISE LOST

A Primer

Michael Cavanagh

Edited by Scott Newstok

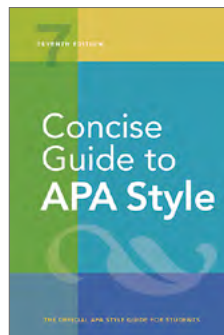

Feb 2020 256pp

9780813232461 Paperback £32.95 / €38.00

A record of a teacher's lifelong love affair with the beauty, wit, and profundity of *Paradise Lost*, celebrating John Milton's un-doctrinal, complex, and therefore deeply satisfying perception of the human condition. After surveying Milton's recurrent struggle as a reconciler of conflicting ideals, this *Primer* undertakes a book-by-book reading of *Paradise Lost*, reviewing key features of Milton's "various style," and why we treasure that style.

This book is emphatically for first-time readers of Milton, with little or no prior exposure, but with ambition to encounter challenging poetry. These are readers who tell you they "have always been meaning to read *Paradise Lost*," who seek to enjoy the epic without being overwhelmed by its daunting learning and expansive frame of reference. Avoiding the narrowly specialized focus of most Milton scholarship, Cavanagh deals forthrightly with issues that recur across generations of readers, gathering selected voices—from scholars and poets alike—from 1674 through the present.

Lively and jargon-free, this *Primer* makes *Paradise Lost* accessible and fresh, offering a credible beginning to what is a great intellectual and aesthetic adventure.

LAUGHING ATOMS, LAUGHING MATTER**Lucretius' *De Rerum Natura* and Satire**

T. H. M. Gellar-Goad

Mar 2020 288pp

9780472131808 Hardback £71.50 / €84.00

Offers the first comprehensive examination of Lucretius' engagement with satire. The author argues that what has often been understood as an artfully persuasive exposition of Epicurean philosophy designed to convert the uninitiated is actually a mimesis of the narrator's attempt to effect such a conversion on his internal narrative audience.

LYRIC POETRY AND SOCIAL IDENTITY IN ARCHAIC GREECE

Jessica Romney

Apr 2020 248pp

9780472131853 Hardback £62.50 / €74.00

By conducting a close reading of six poems and then a broad survey of martial lyric, exile poetry, political lyric, and sympotic lyric as a whole, Jessica Romney demonstrates that sympotic lyric focuses on the same basic behaviours and values to construct social identities regardless of the content or subgenre of the poems in question.

How Hollywood Shaped Colorblind Ideology and Undermined Civil Rights

Justin Gomer

Jun 2020 272pp, 23 illustrations
9781496955802 Paperback £32.95 / €38.00

In the decades after the civil rights movement, the ideology of colorblindness co-opted the language of the civil rights era in order to reinvent white supremacy. The key to this shift, Justin Gomer contends, was film - Hollywood provided the visual medium necessary to dramatize an anti-civil rights agenda over the course of the 70s, 80s, and 90s.

BOOK OF BIRDS

Introduction to Ornithology

John Faaborg

Illustrated by Claire Faaborg

Apr 2020 472pp, 126 colour, 20 b&w photos, 17 maps, 8 tables

9781623497767 Hardback £71.50 / €81.00

Gideon Linccum Nature and Environment Series

John Faaborg, renowned expert on avian ecology and conservation, brings a fresh and accessible sensibility to the study of ornithology. In this beautifully illustrated volume, Faaborg's approachable writing style will engage students and birders alike while introducing them to the study of the evolution, taxonomy, anatomy, physiology, diversity, and behaviour of birds. With its unique focus on ecology, the text emphasizes birds' relationships with the environment and other species while showing the amazing diversity of avian life.

Faaborg pays special attention to the roles that competition, community structure, and reproductive behaviour play in the astonishingly varied and interesting lives of birds seen around the world. He discusses variations in anatomy, morphology, and behaviour; explains why such vast diversity exists; and explores the ways in which different birds can share the same spaces.

Combining vibrant visuals and knowledgeable insights, *Book of Birds* offers readers a firm foundation in the field of ornithology and an invaluable resource for understanding birds from an ecological and evolutionary perspective.

DISCRETE MORSE THEORY

Nicholas A. Scoville

Dec 2019 273pp
9781470452988 Paperback £53.50 / €62.00
Student Mathematical Library, Vol. 90

Discrete Morse theory is a powerful tool combining ideas in both topology and combinatorics. Invented by Robin Forman in the mid 1990s, discrete Morse theory is a combinatorial analogue of Marston Morse's classical Morse theory. This book, the first devoted solely to discrete Morse theory, serves as an introduction to the subject.

THE DISTRIBUTION OF PRIME NUMBERS

Dimitris Koukoulopoulos

Jan 2020 356pp
9781470447540 Hardback £82.50 / €96.00
Graduate Studies in Mathematics, Vol. 203

Prime numbers have fascinated mathematicians since the time of Euclid. This book presents some of our best tools to capture the properties of these fundamental objects, beginning with the most basic notions of asymptotic estimates and arriving at the forefront of mathematical research.

HOCHSCHILD COHOMOLOGY FOR ALGEBRAS

Sarah J. Witherspoon

Jan 2020 264pp

9781470449315 Hardback £91.95 / €108.00

Graduate Studies in Mathematics, Vol. 204

Provides a thorough and self-contained introduction to the theory of Hochschild cohomology for algebras. The book then explores Hochschild cohomology as a Gerstenhaber algebra in detail, the notions of smoothness and duality, algebraic deformation theory, infinity structures, support varieties, and connections to Hopf algebra cohomology.

INTRODUCTION TO COMPLEX ANALYSIS

Michael E. Taylor

Nov 2019 480pp

9781470452865 Hardback £82.50 / €96.00

Graduate Studies in Mathematics, Vol. 202

Explains that all the basic functions that arise in calculus - such as powers and fractional powers, exponentials and logs, trigonometric functions and their inverses, as well as many new functions that the reader will meet - are naturally defined for complex arguments. This leads to a richer understanding of such functions.

AN INTRODUCTION TO SYMMETRIC FUNCTIONS AND THEIR COMBINATORICS

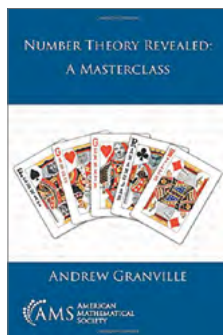

Eric S. Egge

Jan 2020 342pp

9781470448998 Paperback £53.50 / €62.00

Student Mathematical Library, Vol. 91

Offers a reader-friendly introduction to the theory of symmetric functions. It includes fundamental topics such as the monomial, elementary, homogeneous, and Schur function bases. The prerequisites for the book are minimal-familiarity with linear algebra, partitions, and generating functions.

ENGINEERING METHODS FOR PRECIPITATION UNDER A CHANGING CLIMATE

Edited by J. Rolf Olsen & Kelcy Takahashi Adamec

Feb 2020 144pp

9780784415528 Paperback £108.00 / €125.00

Contains seven peer-reviewed papers on engineering design for precipitation extremes. Topics include engineering methods for designing for and managing precipitation extremes and floods, approaches to uncertainty and acceptable risk, and interactions with climate scientists on engineering needs for climate information and projections.

BIODIVERSITY AND THE CLIMATE CRISIS **Essential Understanding and Connections**

Edited by Richard S. Feldman

Dec 2019 350pp

9781516590681 Paperback £84.95 / €102.00 / €87.95

Provides students with a collection of scholarly articles that not only help them to build an appreciation for the vast diversity of species on Earth, but also an understanding of how Earth's climate is changing rapidly, with implications of climate disruption on societies and especially other species.

A WATER STORY

Learning from the Past, Planning for the Future

Geoff Beeson

Mar 2020 304pp

9781486311293 Paperback £59.95 / €70.00

Provides an account of Australian water management practices, set against important historical precedents and the contemporary experience of other countries. The book describes the nature of the country's natural water resources, management of these resources by Indigenous Australians, the development of urban water supply, and more.

CLIMATE CHANGE AND URBAN DEVELOPMENT NEXUS

Edited by Stephanya Lynn JonasLabee

Dec 2019 290pp

9781774072097 Hardback £166.00 / €192.00

Provides an introduction to climate change and sustainable development and urban development. The book covers the impact of greenhouse gases on rising ozone levels and the impact of climate change on urban transportation systems.

ENVIRONMENTAL SCIENCE*Kamal Kant Joshi & Deepak Kumar*

Dec 2019 278pp

9789386768681 Paperback £31.50 / €36.00

Presents scientific knowledge about the concept of environment and its components. The book comprises of ten chapters, beginning with an introduction and the importance of environmental science, then moving on to the physics of natural resources, the structure and functions of ecosystem, biodiversity and conservation.

CARBON CRIMINALS, CLIMATE CRIMES*Ronald C. Kramer**Foreword by Rob White*

Apr 2020 242pp

9781978805583 Paperback £24.50 / €29.00

Critical Issues in Crime and Society

Analyses the looming threats posed by climate change from a criminological perspective. The book advances the field of green criminology through an examination of the criminal nature of catastrophic environmental harms resulting from the release of greenhouse gases.

NUMERICAL MODELING OF SEISMIC RESPONSES FROM FRACTURED RESERVOIRS BY THE GRID-CHARACTERISTIC METHOD*Vladimir Leviant, Igor Kvasov & Igor Petrov*

Nov 2019 264pp

9781560803669 Hardback £150.00 / €173.00

Geophysical Developments, Vol. 17

Addresses the properties of seismic waves of fractured media by describing, modelling, and analysing the various seismic wave responses from discrete fractured media. The book proposes a methodology for the direct detection of fractured reservoirs based on these analyses.

UNDERSTANDING SIGNALS**Basic waveform analysis from a geophysical perspective***Michael Burianyk*

Nov 2019 94pp

9781560803577 Paperback £34.95 / €41.00

Geophysical Monograph, Vol. 23

Written for students as well as professionals who work with and support geophysicists, this book presents a simple and informal discussion of fundamental concepts which underlie the quantitative part of geophysical analysis and interpretation.

EXTRUSION OF POLYMERS**Theory & Practice***Chan I. Chung*

Dec 2019 512pp

9781569906095 Hardback £129.00 / €149.99

Presents single-screw extrusion technology together with the relevant polymer fundamentals, with an emphasis on screw design. The presentation begins on a physical level, providing an in-depth conceptual understanding, followed by an analytical level with mathematical models. Practical applications of the models are illustrated with examples.

THE PHYSICS OF POLYMER INTERACTIONS
A Novel Approach. Application to Rheology and Processing

Jean Pierre Ibar

Dec 2019 464pp
 9781569907108 Hardback £155.00 / €179.99

Understanding of polymer interactions is important for effective processing of plastics and their blends, mixing with nanoparticles, and understanding of their mechanical and physical properties. This book describes a physics of interactions in polymers that challenges existing theories, and explains the concept of entanglement in a different way.

PLASTICS TECHNOLOGY
Introduction and Fundamentals

Christian Bonten

Dec 2019 496pp
 9781569907672 Hardback £86.50 / €99.99

Covers the entire spectrum of the plastics technology/ engineering, from raw material to finished plastic products. The book is intended not just for university/ college students in plastics technology and other engineering disciplines but also for beginners to the field in general.

A Textbook for Engineers and Technologists

Sebastião V. Canevarolo Jr.

Dec 2019 350pp
 9781569907252 Hardback £77.50 / €89.99

An introductory textbook on polymer science aimed at lecturers/professors, undergraduate and graduate students of polymer science and technology courses as well as engineering, chemistry, and physics. Each chapter starts from simple concepts and progressively gets more complex to help the reader decide how deep to go into each topic.

SEMICONDUCTORS AND MODERN ELECTRONICS

Chuck Winrich

Dec 2019 58pp
 9781643275871 Paperback £34.95 / €41.00

Provides a brief introduction to the physics behind semiconductor technologies. Chuck Winrich explores the topic of semiconductors from a qualitative approach to understanding the theories and models used to explain semiconductor devices. Applications of semiconductors are explored and understood through models developed in the book.

A component will not be reliable unless it is designed with required reliability. This book uses reliability to link all design parameters of a component together to form a limit state function for mechanical design. This design methodology uses the reliability to replace the factor of safety as a measure of the safe status of a component.

ELECTRONS IN SOLIDS**Contemporary Topics***Richard A Dunlap*Dec 2019 113pp
9781643276878 Paperback £44.95 / €53.00

The transport of electric charge through most materials is well described in terms of their electronic band structure. This book deals with two cases where the charge transport in a solid is not described by the simple band structure picture of the solid. These cases are related to the phenomena of the quantum Hall effect and superconductivity.

THE PHYSICS OF NOISE

Edoardo Milotti
 Dec 2019 79pp
 9781643277653 Paperback
 £34.95 / €41.00

For a physicist, "noise" is not just about sounds, but refers to any random physical process that blurs measurements, and in so doing stands in the way of

scientific knowledge. This book deals with the most common types of noise, their properties, and some of their unexpected virtues. It also explains mathematical concepts related to noise.

RELATIVISTIC QUANTUM FIELD THEORY, VOLUME 1

Volume 1, Canonical Formalism

Michael Strickland
 Dec 2019 174pp
 9781643276991 Paperback
 £69.95 / €82.00

Introduces the fundamental concepts of quantum field theory using the formalism of canonical quantization. This volume is intended for use as a text for an introductory quantum field theory course that can include both particle and condensed matter physics students.

Volume 2, Path Integral Formalism

Michael Strickland
 Dec 2019 170pp
 9781643277059 Paperback
 £69.95 / €82.00

Presents the quantization of classical field theory using the path integral formalism. This volume begins with the introduction of the path integral formalism for non-relativistic quantum mechanics and then, using this as a basis, extends the formalism to quantum fields with an infinite number of degrees of freedom.

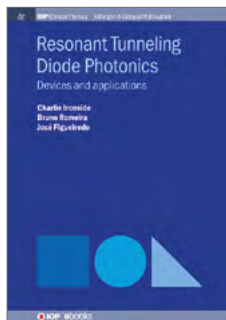

IOP Concise Physics

Volume 3, Applications of Quantum Field Theory

Michael Strickland
 Nov 2019 165pp
 9781643277592 Paperback
 £69.95 / €82.00

Presents advanced topics and applications of relativistic quantum field theory. The application of quantum chromodynamics to high-energy particle scattering is discussed with concrete examples for how to compute QCD scattering cross sections. Experimental evidence for the existence of quarks and gluons is also presented.
